

Depression: activity, reward and workable steps

Original support worksheet | Adults | Reviewed 2026-10-10

Use fictional or appropriately de-identified notes. Write, draw, dictate or point. Not a validated measure, diagnostic test or crisis service.

Situation: Energy, pain, resources, demands

Usual response: Withdraw, postpone or rest

Immediate effect: Relief or protection

Later effect: Connection/reward gained or lost

Feasible alternative: Chosen small step + support

Valued direction and why it matters

Barrier: capacity, access or fear; what could change?

Small step, timing, support and fallback

Expected versus actual meaning, burden and next choice

Next step: who will do what, by when, and how will we review helpfulness or harm?

Suicidality, inability to meet basic needs, severe deterioration or possible activation requires appropriate assessment. A scheduled activity is not a suicide prevention plan or a substitute for clinical care.
