

Social anxiety: attention, predictions and safety strategies

Original support worksheet | Adults | Reviewed 2026-10-10

Use fictional or appropriately de-identified notes. Write, draw, dictate or point. Not a validated measure, diagnostic test or crisis service.

Situation: Accessible? Safe? Desired?

Feared evaluation: Observable prediction

Attention split: Self-monitoring <-> conversation

Strategy: Access support or fear protection?

Review: Evidence, ambiguity, next choice

Situation and a specific feared judgment

Access supports to KEEP; optional strategy to test

What I noticed outside myself during the interaction

What happened; how I will limit unhelpful replay

Next step: who will do what, by when, and how will we review helpfulness or harm?

Bullying, coercion, harassment and discrimination need protection and organizational action. Exposure is not a reason to tolerate abuse. Assess severe depression, suicidality or other acute concerns through the appropriate clinical pathway.
