

My Personal Care Plan

Choose one routine. Make it specific enough to practice.

Routine I want to make easier:

Why this matters to me:

What gets in the way?

- | | |
|--|---|
| ☐ Starting | ☐ Remembering |
| ☐ Too many steps | ☐ Pain |
| ☐ Fatigue | ☐ Sensory discomfort |
| ☐ Privacy | ☐ Body discomfort or dysphoria |
| ☐ Missing supplies | ☐ Time |
| ☐ Mobility or motor demands | ☐ I am not sure yet |

What does 'good enough' completion look like?

My sequence

1.

2.

3.

4.

5.

Supports That Make It More Doable

Test supports that match the barrier. More pressure is not automatically more effective.

Things I want to test

- | | |
|---|--|
| ☐ Visual checklist | ☐ Supplies laid out |
| ☐ Reminder | ☐ Same time/place |
| ☐ Different product | ☐ Different temperature |
| ☐ Gloves or tool | ☐ Music/audio |
| ☐ Sit instead of stand | ☐ First step together |
| ☐ More privacy | ☐ Shorter version |
| ☐ Rest break | ☐ Other |

A sensory change I want to try:

Help I am okay receiving:

Help I do not want:

How I will know the plan is working:

If the routine suddenly became much harder, check pain, illness, dental or skin problems, mood, sleep, medication effects, trauma, and access before assuming this is only a habit problem.
