

Body dysmorphic concerns: checking and participation

Original support worksheet | Adults | Reviewed 2026-10-10

Use fictional or appropriately de-identified notes. Write, draw, dictate or point. Not a validated measure, diagnostic test or crisis service.

Appearance cue: Mirror, photo, comparison

Feared meaning: Judgment or consequence

Checking / concealment: What I do to feel certain

Short relief + life cost: Certainty fades; activity narrows

Treatment goal: Participation, flexible attention

Cue and feared meaning; no photos/flaw scores needed

Checking/concealing and how long relief lasts

Activity or connection restricted

Safety/treatment question and meaningful goal

Next step: who will do what, by when, and how will we review helpfulness or harm?

Assess suicidality, severe deterioration, unsafe attempts to alter appearance or other acute risks through qualified procedures. Do not dismiss risk as vanity or use reassurance as the only response.
