

Learning differences: instruction and access are separate tracks

Original support worksheet | School-age children and school teams | Reviewed 2026-10-10

Use fictional or appropriately de-identified notes. Write, draw, dictate or point. Not a validated measure, diagnostic test or crisis service.

Learning target: Skill or knowledge being measured

Barrier evidence: What prevents demonstration?

PARALLEL TRACKS - instruction and access happen together

Instruction track: Teach the identified skill

Access track: Change format/demand appropriately

Review both: Learning + participation + delivery

Task target and observed barrier

Instruction: skill, method, owner and schedule

Access: format/support, setting and owner

Separate learning/access outcomes and review date

Next step: who will do what, by when, and how will we review helpfulness or harm?

School avoidance with severe distress, bullying, abuse or safety concerns needs timely response. Legal eligibility and test-score interpretation require qualified local procedures; this tool does not determine either.
