

Child aggression: safety, function and caregiver coaching

Original support worksheet | School-age children and caregivers | Reviewed 2026-10-10

Use fictional or appropriately de-identified notes. Write, draw, dictate or point. Not a validated measure, diagnostic test or crisis service.

Before: Demand, access, health, context

Observed action: Camera-level description

After: Responses and immediate change

Competing explanations: Pain, skill, access, learning

Support + skill: Safer alternative and review

Before/action/after with source of information

Health/access and competing explanations to assess

One preventive support and alternative communication skill

Safety route, responsible team and review measures

Next step: who will do what, by when, and how will we review helpfulness or harm?

Injury, weapons, abuse, imminent harm or inability to maintain safety requires urgent/local safeguarding response. Do not provoke unsafe behavior to test function, improvise restraint or use food/sleep deprivation or humiliation.
