

Health anxiety: checking and a clear medical plan

Original support worksheet | Adults | Reviewed 2026-10-10

Use fictional or appropriately de-identified notes. Write, draw, dictate or point. Not a validated measure, diagnostic test or crisis service.

Cue: Symptom or health thought

Threat meaning: What I fear it signifies

Checking/searching: What certainty I seek

Brief relief / later cost: Attention and activity impact

Two-part plan: Medical guidance + anxiety support

Cue and feared meaning; avoid repeated body scanning

Checking/searching and short versus later effect

Medical plan: owner, follow-up and advice for changes

Participation goal and psychological support to discuss

Next step: who will do what, by when, and how will we review helpfulness or harm?

New, severe, changed or otherwise concerning physical symptoms need appropriate medical assessment. Follow the clinician's advice and urgent local pathways; this worksheet must not classify symptoms as harmless.
